

Employment composition across fixed routine-task-intensity quartiles

Notes: Denominator is all ASEC-weighted respondents employed at the survey date in each pooled three-year window. Unmapped RTI: 1.13% (4,731,617 pooled weighted person-years) in 2004-2006; 1.31% (6,370,050) in 2023-2025. Quartile cutpoints are fixed from the 2004-2006 weighted distribution. Static occupation-level RTI mapping; descriptive cohort comparison, not a causal computerization estimate.
